Present

Cybercrimes:When Virtual Realities Become Real-Life Nightmares
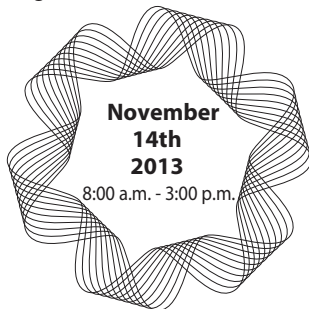

Description :

Technology moves at a rapid pace. With the increased reliance on technologies, there is an increased security risk since telecommunications and the internet are often used to orchestrate and facilitate criminal activities. It is therefore crucial for governments, businesses and citizens to keep up to date on the latest trends in cybercrimes and cyber security. This workshop is timely and caters to both the professional and anyone interested in the subject matter. Cybercrimes and cyber security are becoming increasingly important areas of criminology in Trinidad and Tobago as more social activities take place online.

You will be exposed to :

- The general overview of cybercrimes
- The terms associated with cybercrimes and cyber security
- The scope of issues concerning cyber security
- The Budapest Convention and cybercrimes law
- A discussion on the international debate on cyber security
- Effective management strategies related to cybercrime
- What we can do in Trinidad and Tobago to protect ourselves from cyber attacks

Instructors :

- Guest Speaker from the William J. Perry Center for Hemispheric Defense Studies
- UTT Approved Instructors

November 14th 2013
8:00 a.m. - 3:00 p.m.
