

## **Cybercrimes: When Virtual Realities Become Real-Life Nightmares**

### **DESCRIPTION:**

All sectors of society, from governments to businesses to individual citizens, have become more reliant on computers and advancing technologies. With an increased reliance on technologies, there is an increased security risk. Technology, specifically telecommunications and the internet, is often used to orchestrate and facilitate criminal activities and individuals need to know how to manage the risks associated with it.

Technology moves at a rapid pace. It is crucial for governments, businesses and citizens to keep up to date on the latest trends in cybercrimes and cyber security. This workshop is timely and caters to both the professional and anyone interested in the subject matter. What we do know is that cybercrimes are on the rise and Trinidad and Tobago cannot ignore it.

### **YOU WILL BE EXPOSED TO:**

- The General Overview of Cybercrimes
- The Terms Associated with Cybercrimes and Cyber Security
- The Scope of Issues Concerning Cyber Security
- The Budapest Convention and Cybercrimes Law
- A Discussion on the International Debate on Cyber Security
- Effective Management Strategies Related to Cybercrime
- What We Can Do in Trinidad and Tobago to Protect Ourselves from Cyber Attacks

### **DESIGNED FOR:**
